

evidence-gated exits; legal regressions dashed

*model-call path hooks: guard (policy), snapcompact,
middleware-crate hooks (trace + tier field, continuation, per-role output tokens)*

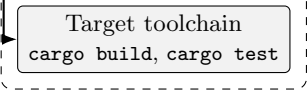

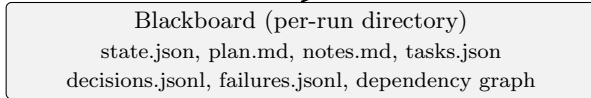

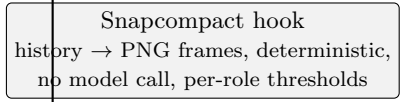

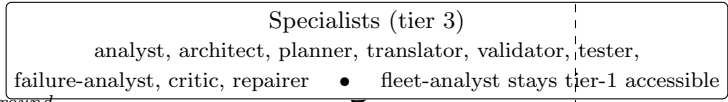

every call

Skip(feedback) teaches the caller

*lead inner loop: own turn budget + stagnation breaker;
dispatches only its own members (depth cap 3);
result folds into one TaskResult for the orchestrator*

*hierarchy enabled:false reproduces the single-tier behavior byte for byte;
toolchain exit codes gate the phases*

guarded exec
